

## MP100 | WEB DEVELOPMENT PROJECT STATEMENT

Title: Wildlife Park

Semester/Year: Spring 2024

Coding language/software: HTML/Sublime Text

I choose exploring a wildlife park with a variety of wild animals.. The reason I chose this topic is because it was easier to find open license/free images. There isn't a specific story for this topic. I tested various options for the styles. I ensured all images were scaled down uniformly for every page. I had issues organizing html pages into folders and properly linking them in the relevant code. I was able to organize all the images into one folder.
